## Sports & Play Fencing Systems: Duo® Sports

Duo... whatever the sport

NEW - Available as 3m high single panel

Fixings every 200mm and synthetic rubber inserts at each lining virtually eliminate rattle during play. A clamp bar covering panel ends ensures a safe playing surface with no sharp edges.

Evolved from the Duo6 and Duo8 products, Duo Sports is ideal for both light usage courts and for heavy use with Multi Use Games Areas in urban settings.

One of the major stumbling blocks during the planning of sports courts is the noise that occurs during play. Like Duo, Duo Sports is available using either 6mm or 8mm twin horizontal wires, however Duo Sports has been developed to overcome the rattle that so many residents object to. Duo Sports uses twice as many fixings to mount the panels to the posts, ensuring that there is minimum movement between the two. Furthermore, each fixing uses a synthetic rubber EPDM insert to insulate the panel from the post. Panels can be cranked inwards to increase ball retention and the addition of Zaun goal units (see page 38-39) will increase user participation.

Duo Sports conforms to BS EN 15312:2007

Duo® Sports page 26

For additional fixtures, fittings and options see pages 62-63

### Specifications

Height Available Mesh Pattern Horizontal Wires Vertical Wires Post Centres Panels fixed to posts 0.43 - 6.13m 200 x 50mm Duo6 (6mm) Duo8 (8mm) Duo8 (5mm) Duo8 (9mm) 2.525m Fixings every 200mm

### Detail Specifications

Fence Height	Post Section	Panel Weight	Finish
0.43 - 2.23m	60 x 40mm
