Heavy duty chequer plate steel

Dimensions:

350mm x 216mm x 204mm

Finish:

Yellow high visibility or white powder coating

Installation:

Concreted in, finish top surface level with top of PF5800 (soak away required)

Optional Extras:

- Warning signage
- Anchor fixings
- Speed ramp

The PF5800S Sunken Flow Plates

The PF5800S sunken flow plate is an ideal solution for controlling one way traffic. They are strong, durable and are an alternative to our Surface Mounted type.

The PF5800 incorporates an inbuilt counter-balance action, insuring that the PF5800 returns to the upright position after a vehicle has passed over it. Constructed from heavy steel, the flow control plate is designed to encourage a mono-directional flow of traffic, as well as preventing vehicles from entering, if they are travelling from the opposing direction. They also have built in noise reduction buffers which prevent the common crashing metal sound in lesser models.

suitable for installations where a substantial foundation is not already present.

Not suitable for heavy goods vehicles (max 7.5 tonne)

We highly recommend the use of speed ramp and warning signage in conjunction with flow plates.

The PF5800 sunken traffic flow control plates are
