

About This Product:

PFGSM-1 GSM intercom is a new entrance intercom which works on the same technology as mobile phones and it also has an additional access control feature.

Intercom: When the visitors push the call button of the PFGSM-1 GSM intercom to a land-line or mobile phone of the User's choice. It enables a call to three telephone numbers, if the first is busy or not answered the call will then be diverted to the second and the third.

Access Control: When authorised numbers have been programmed in, (100 maximum) telephone numbers stored in the intercom when they call it, the unit will recognize an authorized telephone number — then reject the call without answering (so there will be no charge) and open the gate / door. This makes our unit very economical to run in the future. .
